

# Priyadharshan Sengutuvan

[sengutuvan.p@northeastern.edu](mailto:sengutuvan.p@northeastern.edu) | (857) 397-8847 | [linkedin.com/in/priyadharshan-sengutuvan](https://www.linkedin.com/in/priyadharshan-sengutuvan)

## EDUCATION

<b>Northeastern University</b> , Khoury College of Computer Sciences	Boston, MA
<i>Master of Science in Data Science</i>	May 2026
Relevant Coursework: Machine Learning, NLP, Algorithms, MLOps	
<b>Sri Krishna College of Engineering and Technology</b>	Coimbatore, India
<i>Bachelor of Technology in Information Technology</i>	May 2023

## SKILLS

<b>Programming:</b> Python (NumPy, Pandas, Scikit-learn, PyTorch, TensorFlow), SQL (PostgreSQL, MySQL), R, C#
<b>Machine Learning:</b> Supervised/Unsupervised Learning, Deep Learning (CNNs, Transformers, BERT), NLP, XGBoost, Feature Engineering, Hyperparameter Tuning, Model Evaluation, A/B Testing
<b>Data Engineering:</b> Apache Spark, GCP BigQuery, Apache Airflow, Docker, ETL Pipelines, Neo4j, Git
<b>Tools &amp; Frameworks:</b> FastAPI, LangChain, Tableau, Azure DevOps, CI/CD

## EXPERIENCE

<b>AriesView</b>	Boston, MA (Remote)
<i>AI/ML Engineer Intern</i>	Sept 2025 – Dec 2025
<ul style="list-style-type: none"><li>Built financial modeling platform with automated dashboards enabling investors to analyze property performance through real-time NOI, cap rate, and DSCR visualizations, deployed for 1K+ expected users.</li><li>Created backend pipelines automating multi-scenario projections with sensitivity analysis to accelerate investment workflows for analysts.</li><li>Enhanced OCR extraction system for financial documents by adding validation rules, boosting accuracy while eliminating manual data entry.</li><li>Optimized RAG chatbot using Neo4j graph database for relationship-aware retrieval, experimenting with embeddings and hybrid search strategies.</li></ul>	
<b>Psiog Digital Private Limited</b>	Chennai, India
<i>Software Engineer Intern</i>	Feb 2023 – Dec 2023
<ul style="list-style-type: none"><li>Developed automated dashboards in React/C# displaying KPIs, replacing manual Excel workflows to enable data-driven decisions.</li><li>Refactored SQL Server through query rewriting and indexing, significantly reducing load times for transaction analytics.</li><li>Designed REST APIs connecting backend services, streamlining access across siloed systems.</li></ul>	

## PROJECTS

<b>RAG-Based Operations Assistant for E-Commerce</b> ( <a href="#">GitHub</a> )	<i>Python, LangChain, GCP, Airflow, Docker</i>
<ul style="list-style-type: none"><li>Built RAG chatbot using LangChain and GPT-4 to automate seller support, leveraging semantic search with OpenAI embeddings.</li><li>Architected Airflow ETL pipelines ingesting multi-source data into BigQuery with incremental loading for real-time dashboards.</li><li>Improved retrieval precision from 0.68 to 0.87 through systematic experiments with embeddings, chunking, and prompt engineering.</li></ul>	
<b>BERT Fine-Tuning for Sentiment Analysis</b> ( <a href="#">GitHub</a> )	<i>Python, PyTorch, HuggingFace, BERT</i>
<ul style="list-style-type: none"><li>Fine-tuned BERT-base on 570K reviews achieving 91.3% accuracy, applying learning rate scheduling and gradient clipping.</li><li>Conducted statistical analysis discovering battery complaints occur 3.2x more in negative electronics reviews via chi-square tests.</li><li>Balanced precision (0.70) and recall (0.72) through threshold tuning for deployment scenarios with asymmetric costs.</li></ul>	
<b>Credit Card Fraud Detection with Imbalanced Learning</b> ( <a href="#">GitHub</a> )	<i>Python, XGBoost, Scikit-learn, SMOTE</i>
<ul style="list-style-type: none"><li>Developed XGBoost classifier on imbalanced data (0.17% fraud rate), applying SMOTE and stratified CV to achieve 0.94 recall, 0.88 precision.</li><li>Engineered velocity features, z-scores, and entropy metrics, raising model AUC from 0.91 to 0.96 via domain-informed design.</li><li>Achieved sub-200ms inference latency for practical real-time deployment in transaction authorization systems.</li></ul>
